After evaluating our transponder rental charges at \$40 we felt that it was too high of a fee for individuals that couldn't afford to buy so we are reducing our rental fees to \$25 per race night.

NOTE:

To all of those who already own their own transponders please be aware that transponders have a 14 hour charge time and it is the drivers responsibility to have their transponder charged properly so they can be accurately scored for the race events.

See link for proper transponder charging instructions

Thank you - CNS Management.
